

HTML and CSS validators allow you to check if your web page contains any errors.

They will allow you to upload a .html file or .css file to the website and it will produce a report indicating if your page (as you've written it) contains any errors.

Validating HTML:

https://validator.w3.org/#validate_by_upload

Validating CSS:

<https://jigsaw.w3.org/css-validator/validator.html.en>

Steps:

1. Choose the "Validate by File Upload" tab.
2. Browse to the file that you want to check, (select the "Choose File") button and click on 'Open'.
3. Select the "Check" button to carry out the "checking" operation.
